

SHIVAM BHARDWAJ

Cloud & DevOps Engineer

 shivam.bhardwaj.cloud@gmail.com  [LinkedIn](#)  [Github](#)  [Portfolio/Linkhub](#)  +91 9716022473  Delhi, India

PROFESSIONAL SUMMARY

Results-driven Cloud & DevOps Engineer with hands-on expertise in AWS, Docker, and Kubernetes. Specialized in Linux administration and automating infrastructure via scripting to accelerate deployments. Proven track record of managing high-availability multi-server environments, database integrations, and ensuring 99.9% system uptime.

EDUCATION

Delhi University

Bachelor of Arts (Program) – Computer Application

Jetking

Diploma in Cloud Computing

Delhi, India

2023 – 2026

Delhi, India

2024 - 2025

SKILLS

- **Cloud & Infrastructure:** AWS (EC2, S3, IAM, VPC, ALB), Azure, Cloud Cost Optimization (FinOps).
- **Containers & Orchestration:** Docker, Docker Compose, Kubernetes (K8s/KIND).
- **DevOps & CI/CD:** Terraform (IaC), Git, GitHub, GitLab, Jenkins, CI/CD Pipelines.
- **Scripting & Automation:** PowerShell, Shell/Bash Scripting, Python, Webhook Integrations.
- **OS & Servers:** Linux (Ubuntu), Windows Server, Nginx, Active Directory.
- **Databases & Networking:** MS-SQL, MySQL, MongoDB, TCP/IP, DNS, DHCP, Load Balancing.

WORK EXPERIENCE

IT Support Executive

AltezzaSys Systems | Noida, India

March 2026 – Present

- **System Integration & Automation:** Architected and deployed a localized MS-SQL server (via RDP) to bridge on-premise biometric hardware with the Keka HRMS SaaS platform, establishing 24/7 real-time automated data synchronization.
- **Infrastructure Monitoring:** Developed custom PowerShell scripts to automate the auditing of 600+ enterprise endpoints, extracting real-time hardware telemetry and routing data via Discord Webhooks for centralized monitoring.
- **Cloud & FinOps Initiatives:** Executed cloud cost-optimization by containerizing web portfolios, conducting live stress tests on Azure, and migrating static assets to GitHub Pages to minimize operational costs.
- **Workflow Optimization:** Engineered automated data-reconciliation pipelines using advanced Excel logic (XLOOKUP), compressing critical master datasets from 32MB to 152KB to ensure 100% asset accuracy.

Infrastructure Engineer (Intern)

NetCreativeMind Solutions | Delhi, India

April 2025 – Dec 2025

- **Cloud Deployment & Testing:** Gained hands-on experience by deploying, configuring, and testing cloud-native architectures utilizing core AWS services (EC2, S3, IAM) in a live corporate environment.
- **Server Provisioning & Security:** Automated the installation and configuration of Linux and Windows Server environments, implementing strict firewall rules and port configurations for secure application hosting.
- **Identity & Access Management:** Administered enterprise Active Directory, Remote Desktop (RDP) services, and NTFS permissions using Role-Based Access Control (RBAC) to enforce zero-trust security policies.
- **Network Reliability:** Managed advanced troubleshooting for TCP/IP, DNS, and DHCP protocols, conducting proactive system health monitoring to minimize service downtime.

PROJECTS

1. Employee Document Portal Migration | Flask, AWS (EC2, S3, RDS), Docker, IAM | [GitHub Repo](#)

- Architected a 4-phase evolutionary migration of a legacy app to a cloud-native architecture, implementing stateless containers and transitioning from local SQLite to AWS RDS (PostgreSQL).
- Replaced persistent volumes with AWS S3 for scalable object storage and configured IAM Instance Roles for secure, keyless authentication.

2. High-Availability K8s Microservices | Docker, Kubernetes (KIND), Nginx Ingress | [GitHub Repo](#)

- Containerized a frontend application via multi-stage builds and orchestrated a multi-node Kubernetes cluster.
- Configured Nginx Ingress and ensured high availability through Horizontal Pod Autoscaler (HPA), independently debugging pod failures.

CERTIFICATIONS

- Diploma in Cloud Computing – Jetking Infotrain Limited (2024 - 2025)
- Introduction to Containers – AWS
- Network Basics – Cisco Networking Academy
